

How to be effective with Information Systems, Security, & Compliance for Nevada Healthcare Association

PRESENTED BY STEPHEN ARNDT

Who am I and why do you need me?

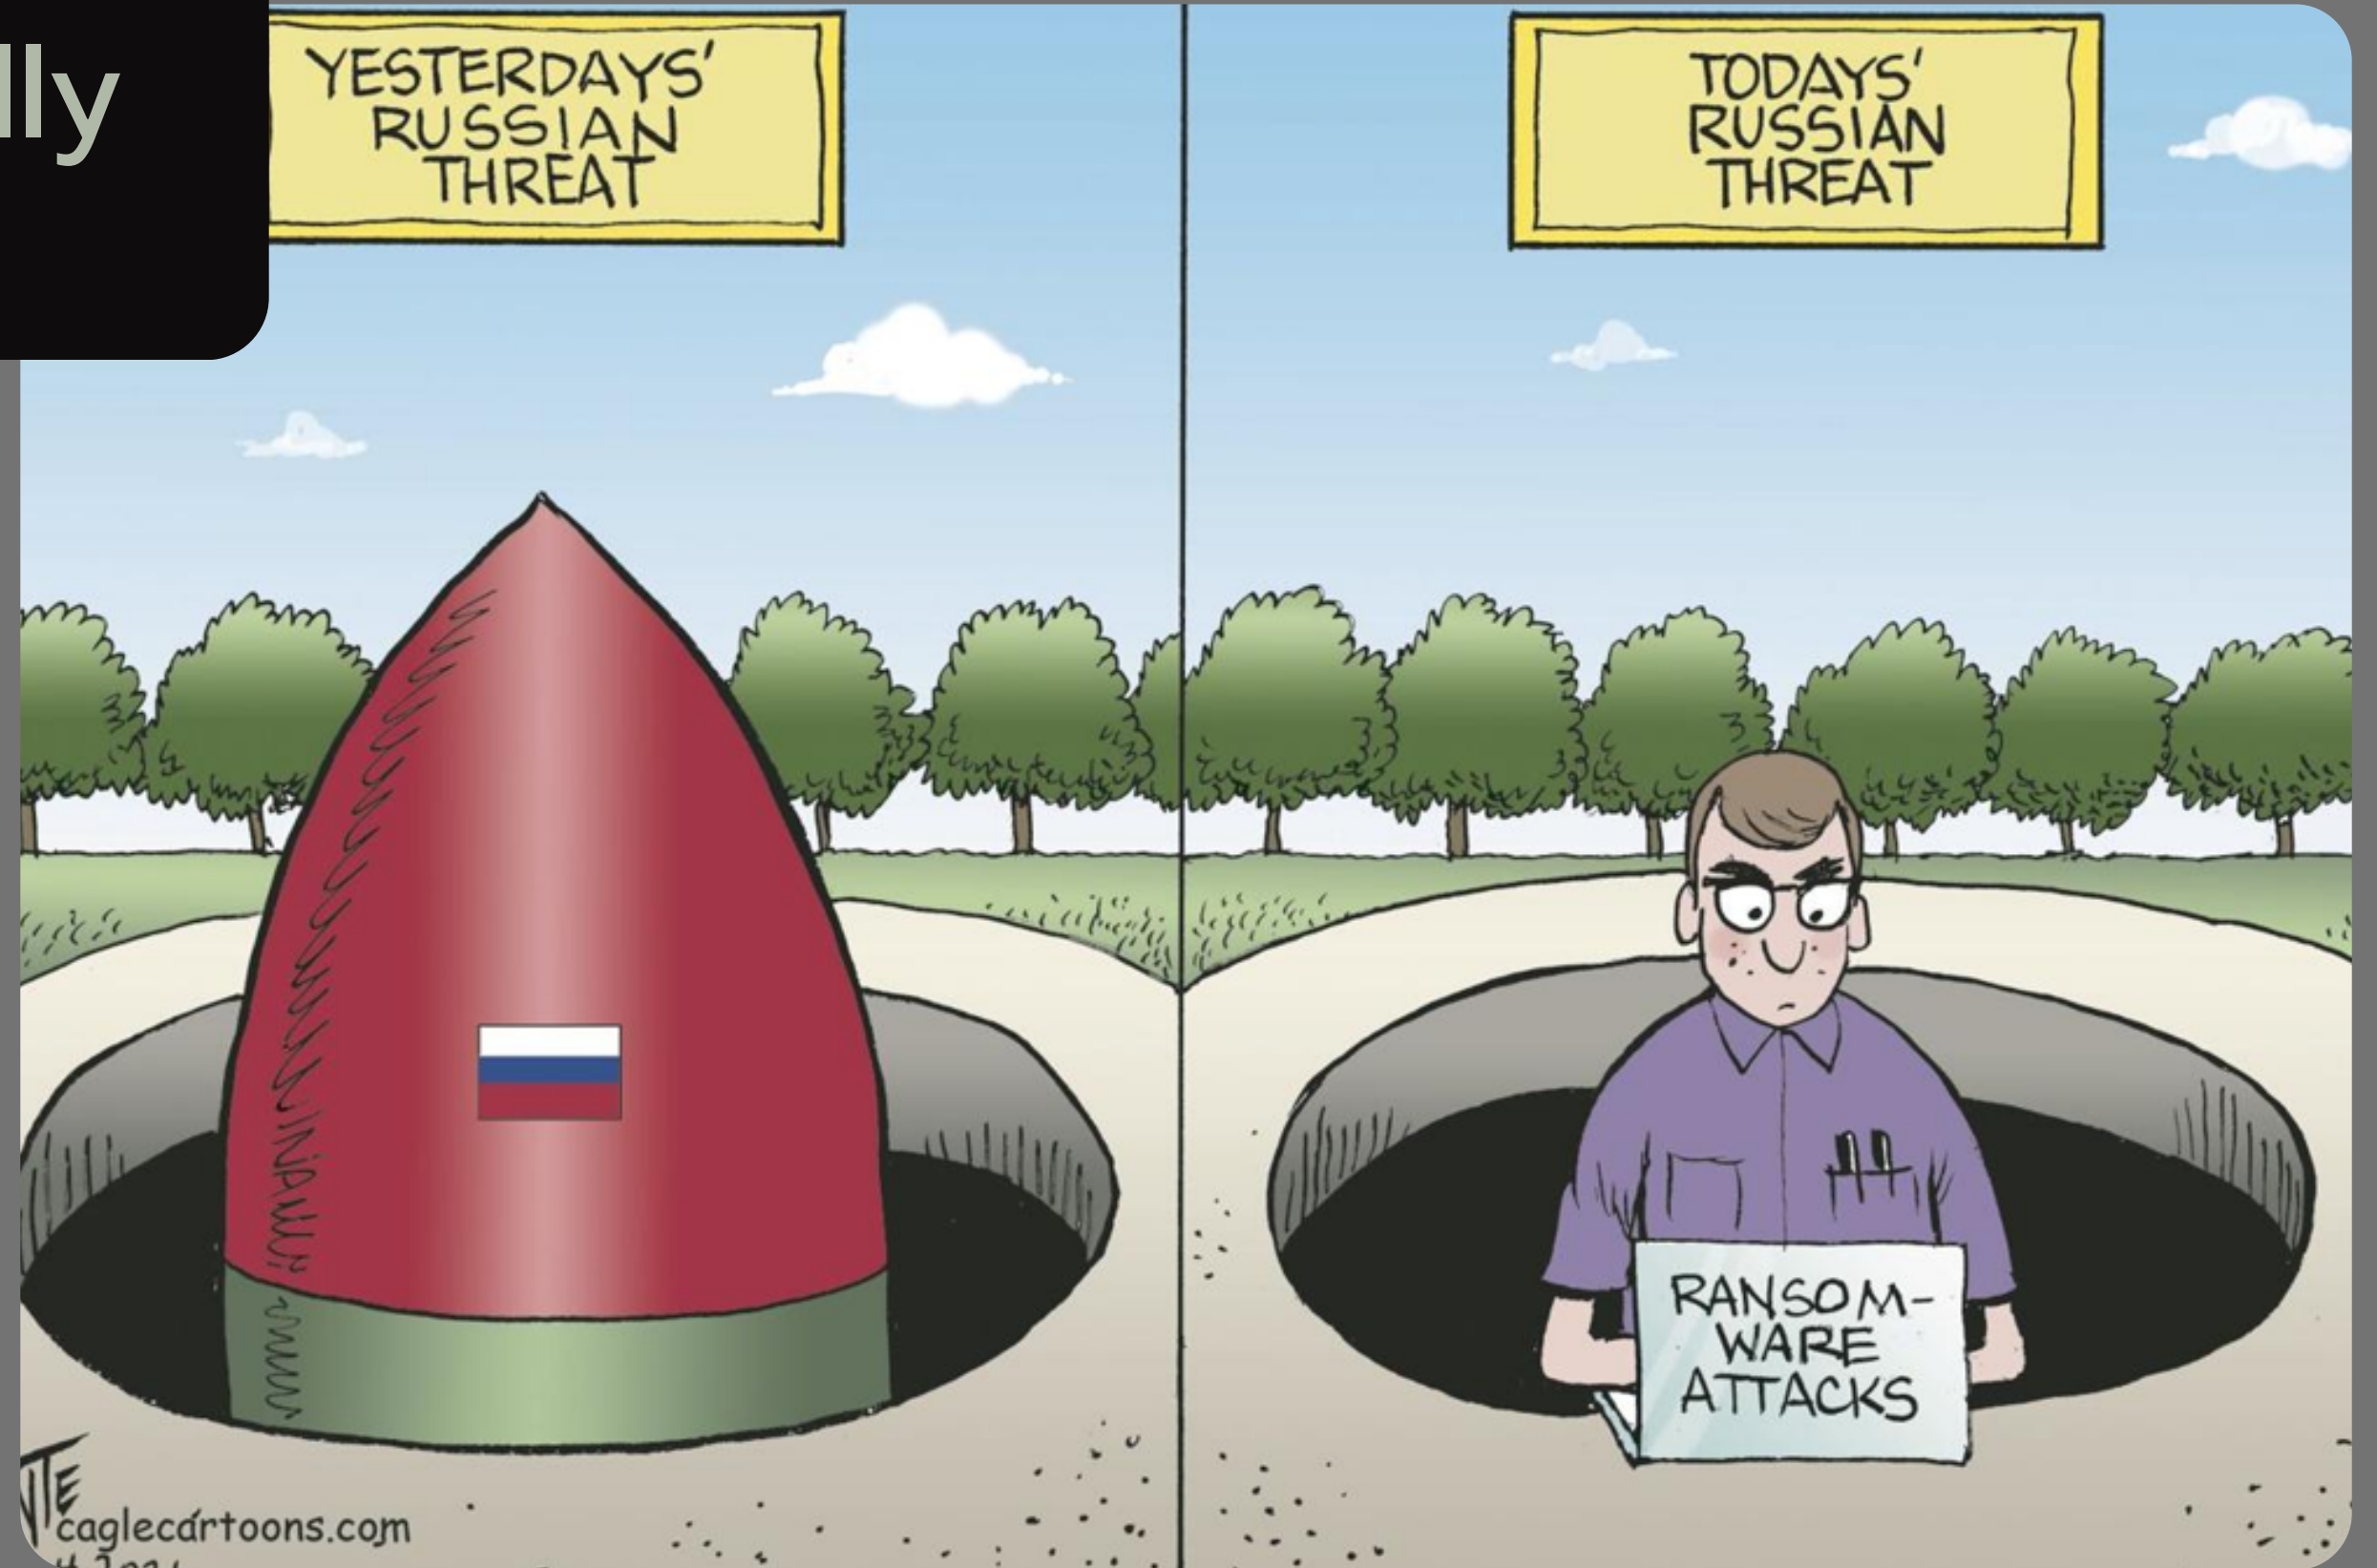

And what you will learn today...

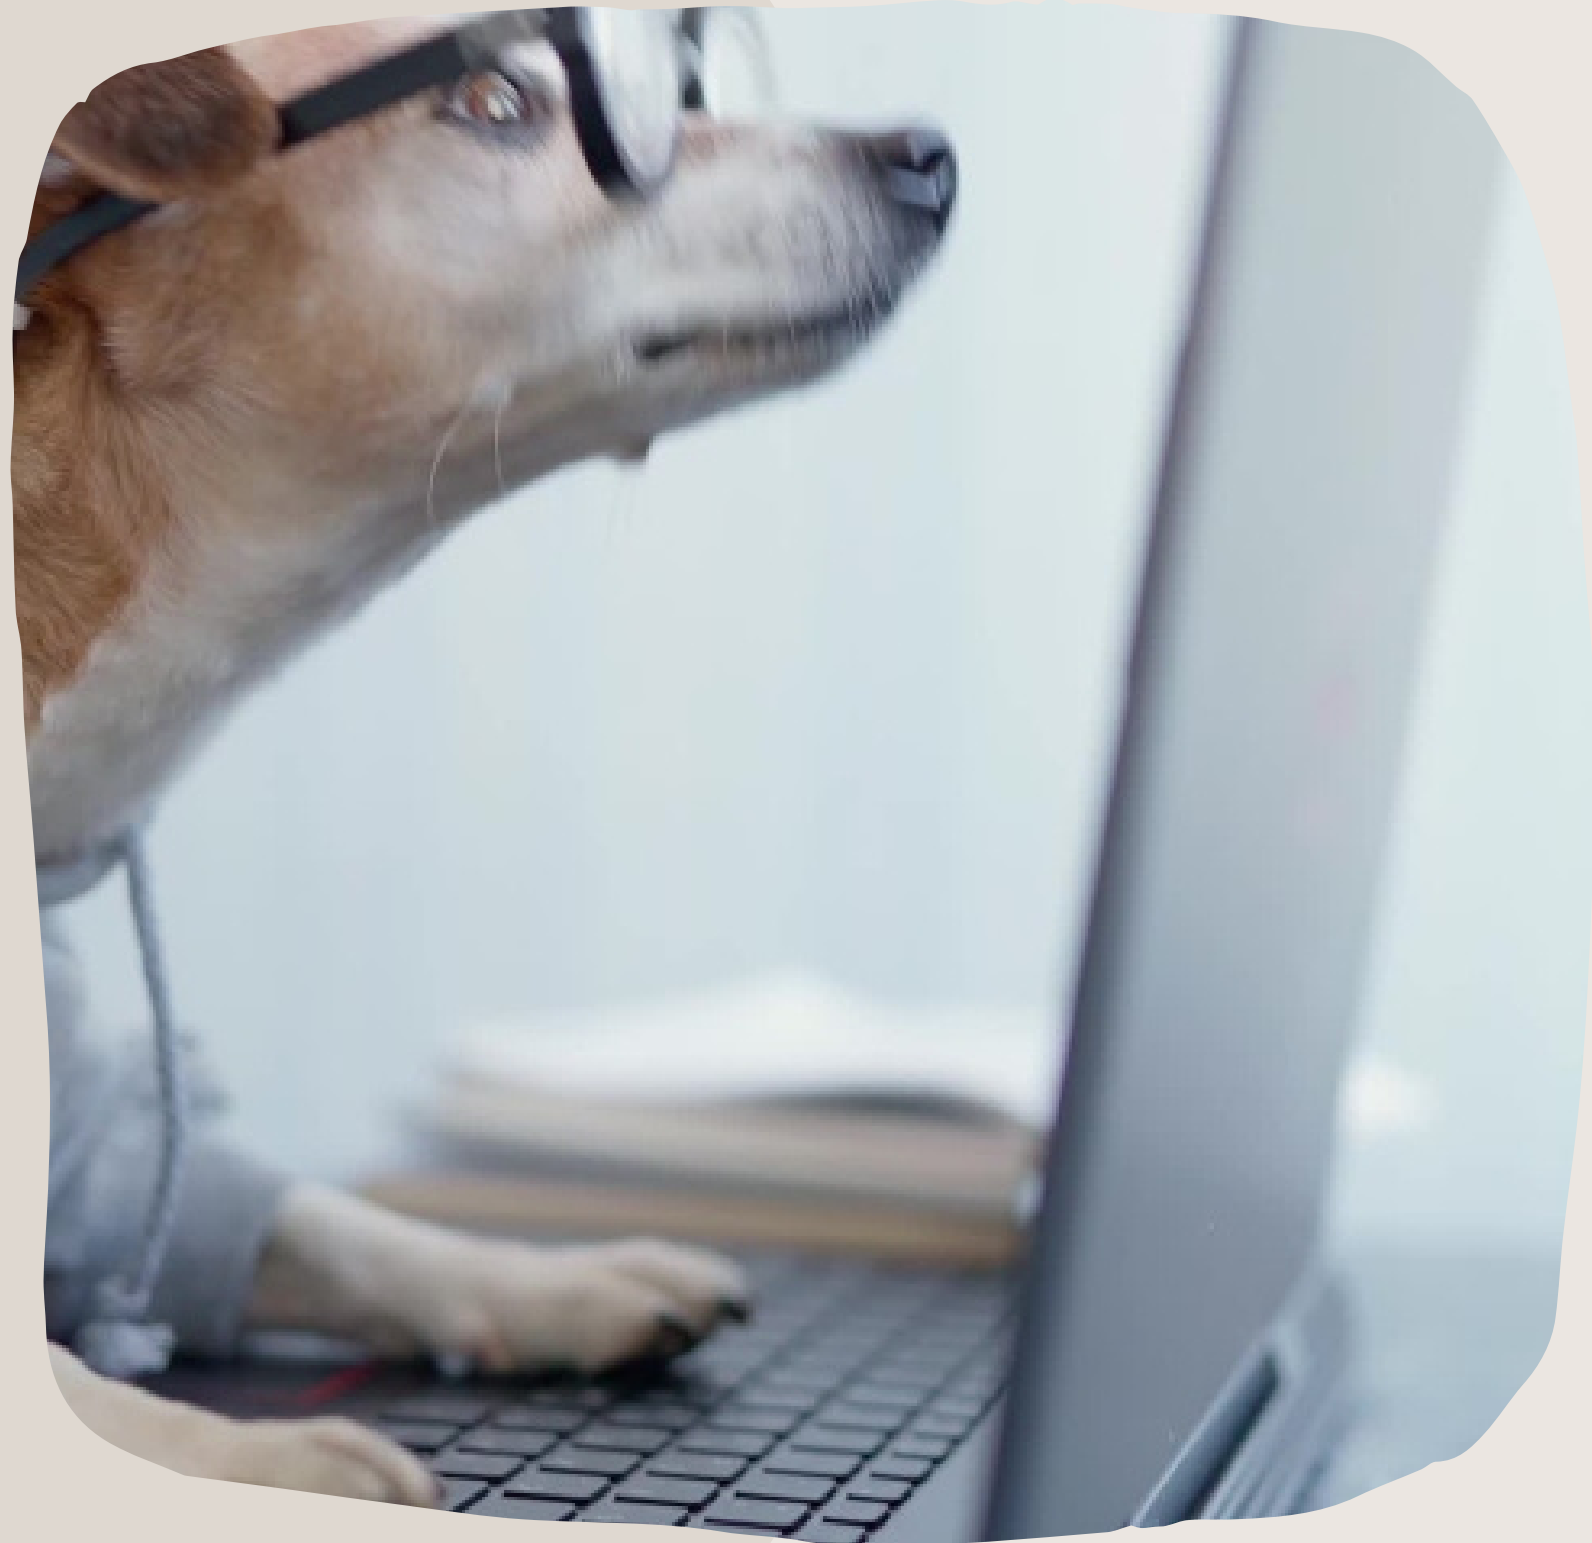

Overview:

- Why you need responsive IT
- The dangers to look out for
- Actionable and practical things to look for in IT

Yeah, sure - we've heard this before. Has anything really changed?

How much does IT really touch?

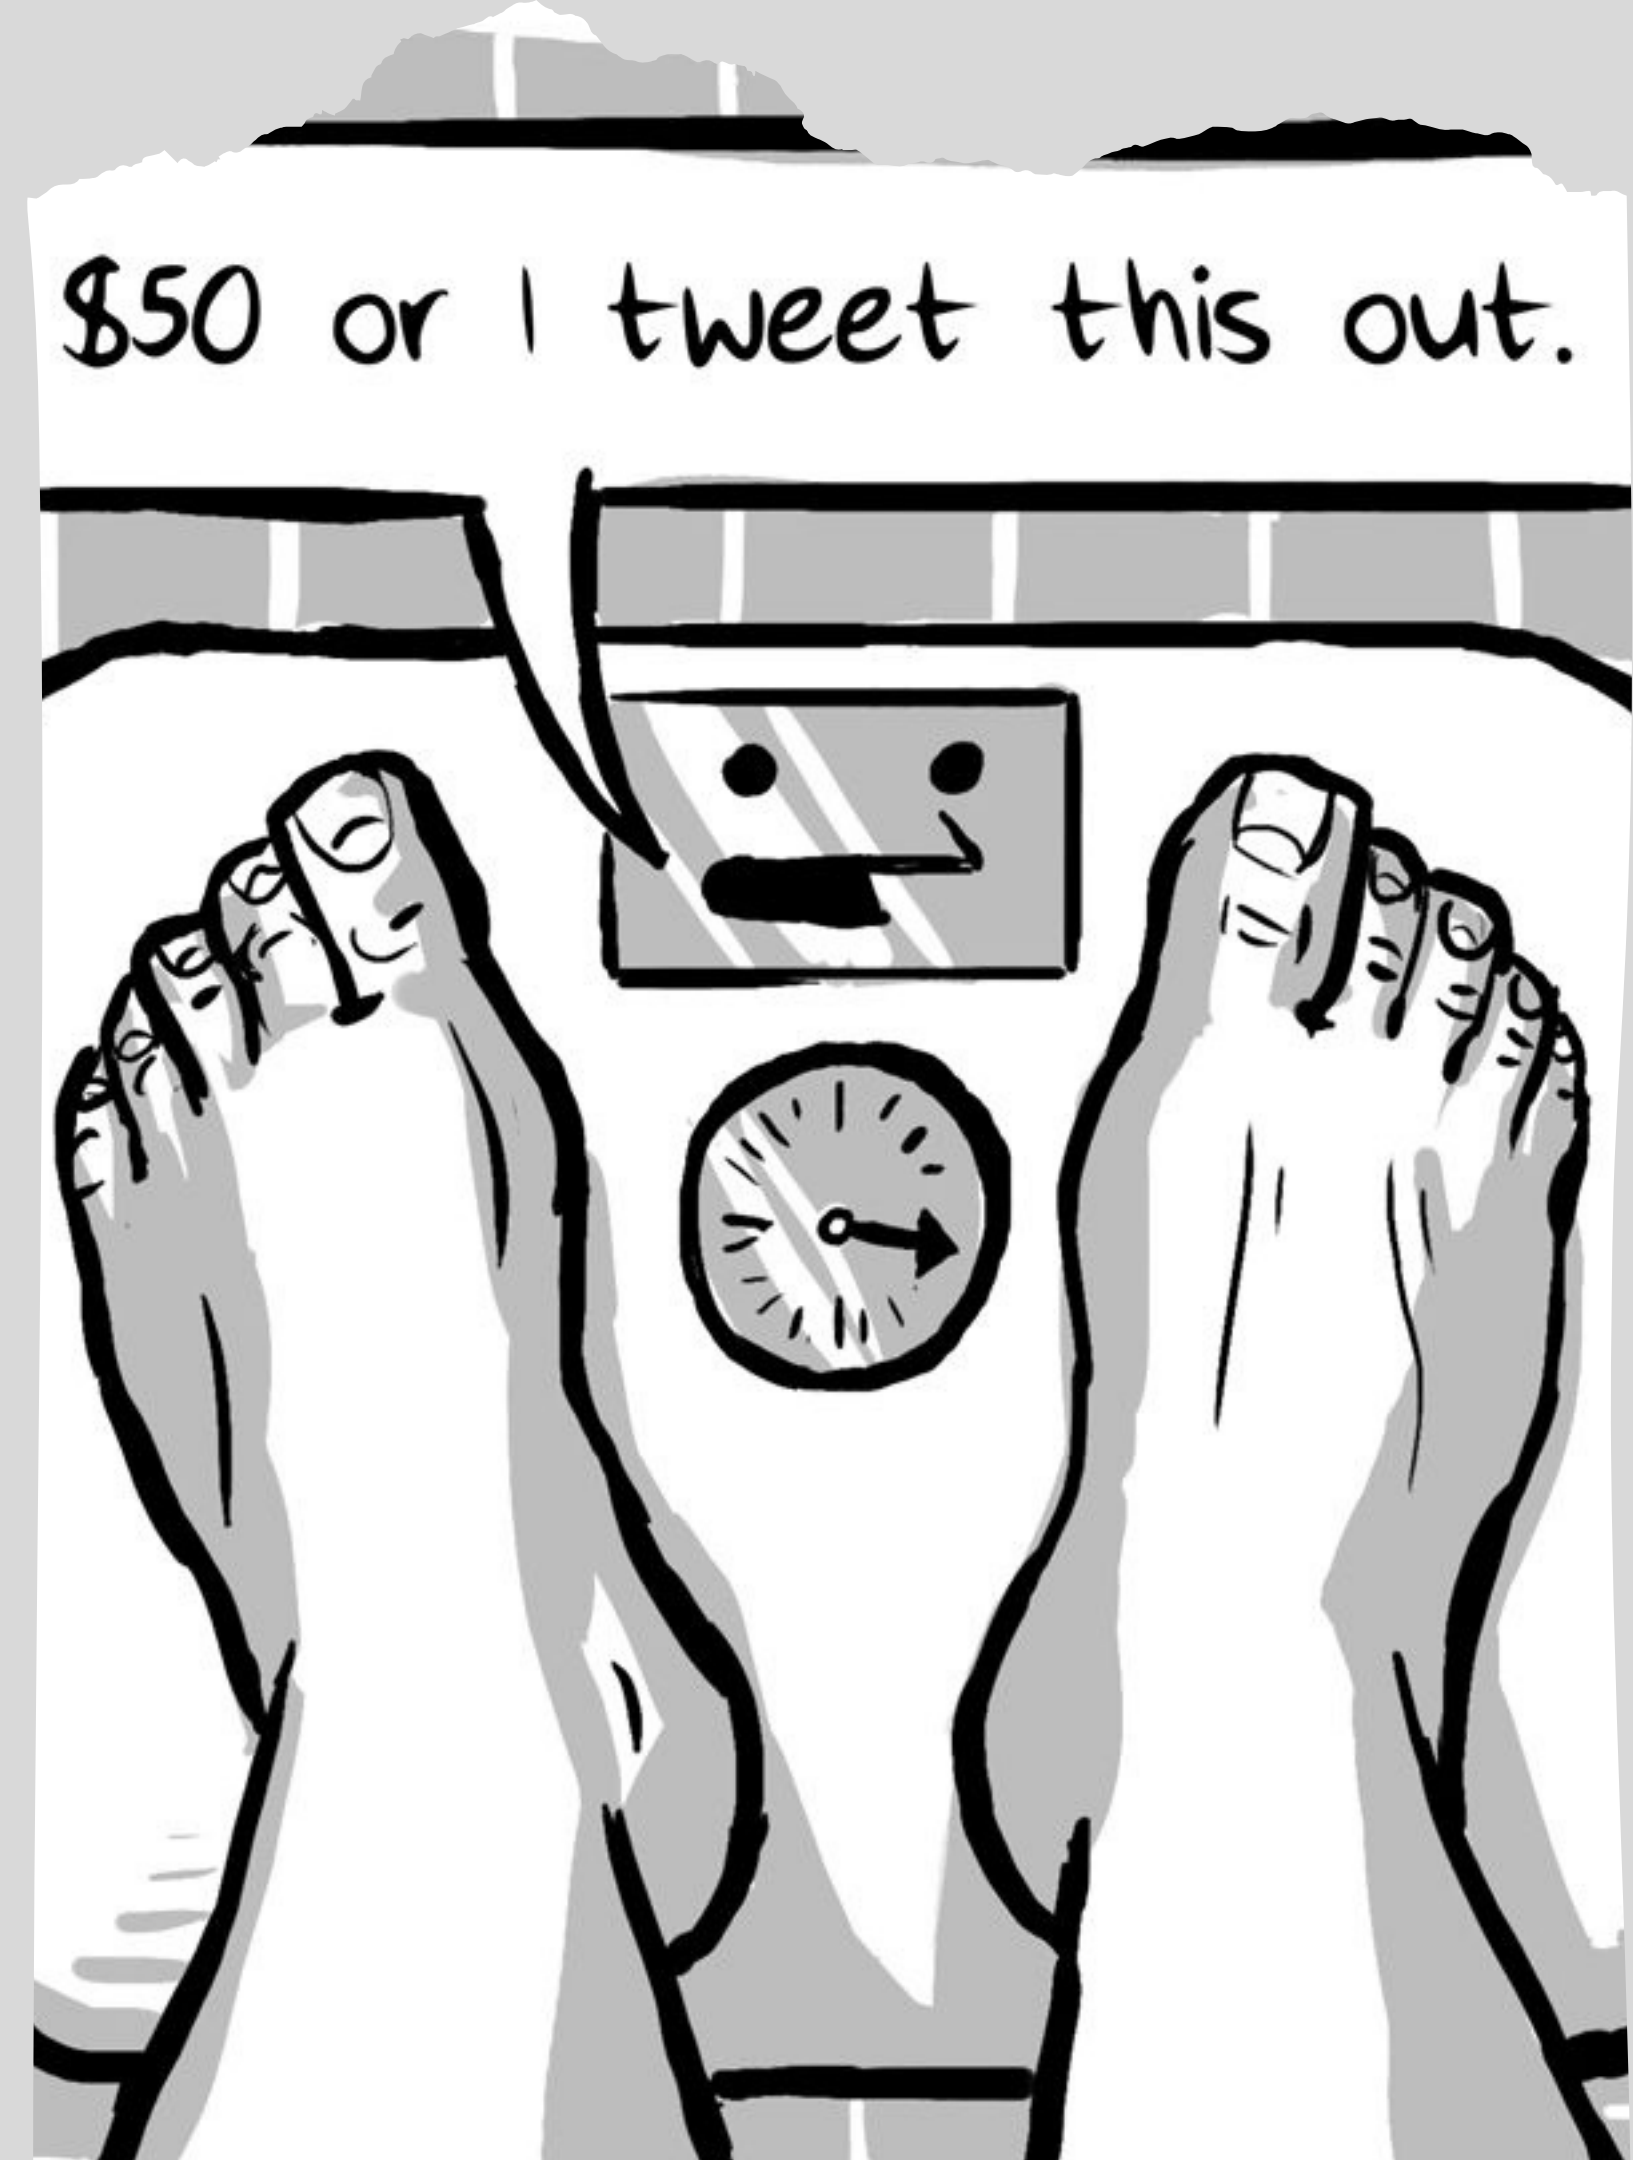

98%

IT encompasses almost every aspect of every business

What threat and risks do you face?

Complexity + Ignorance =

Environment Ripe for Exploitation

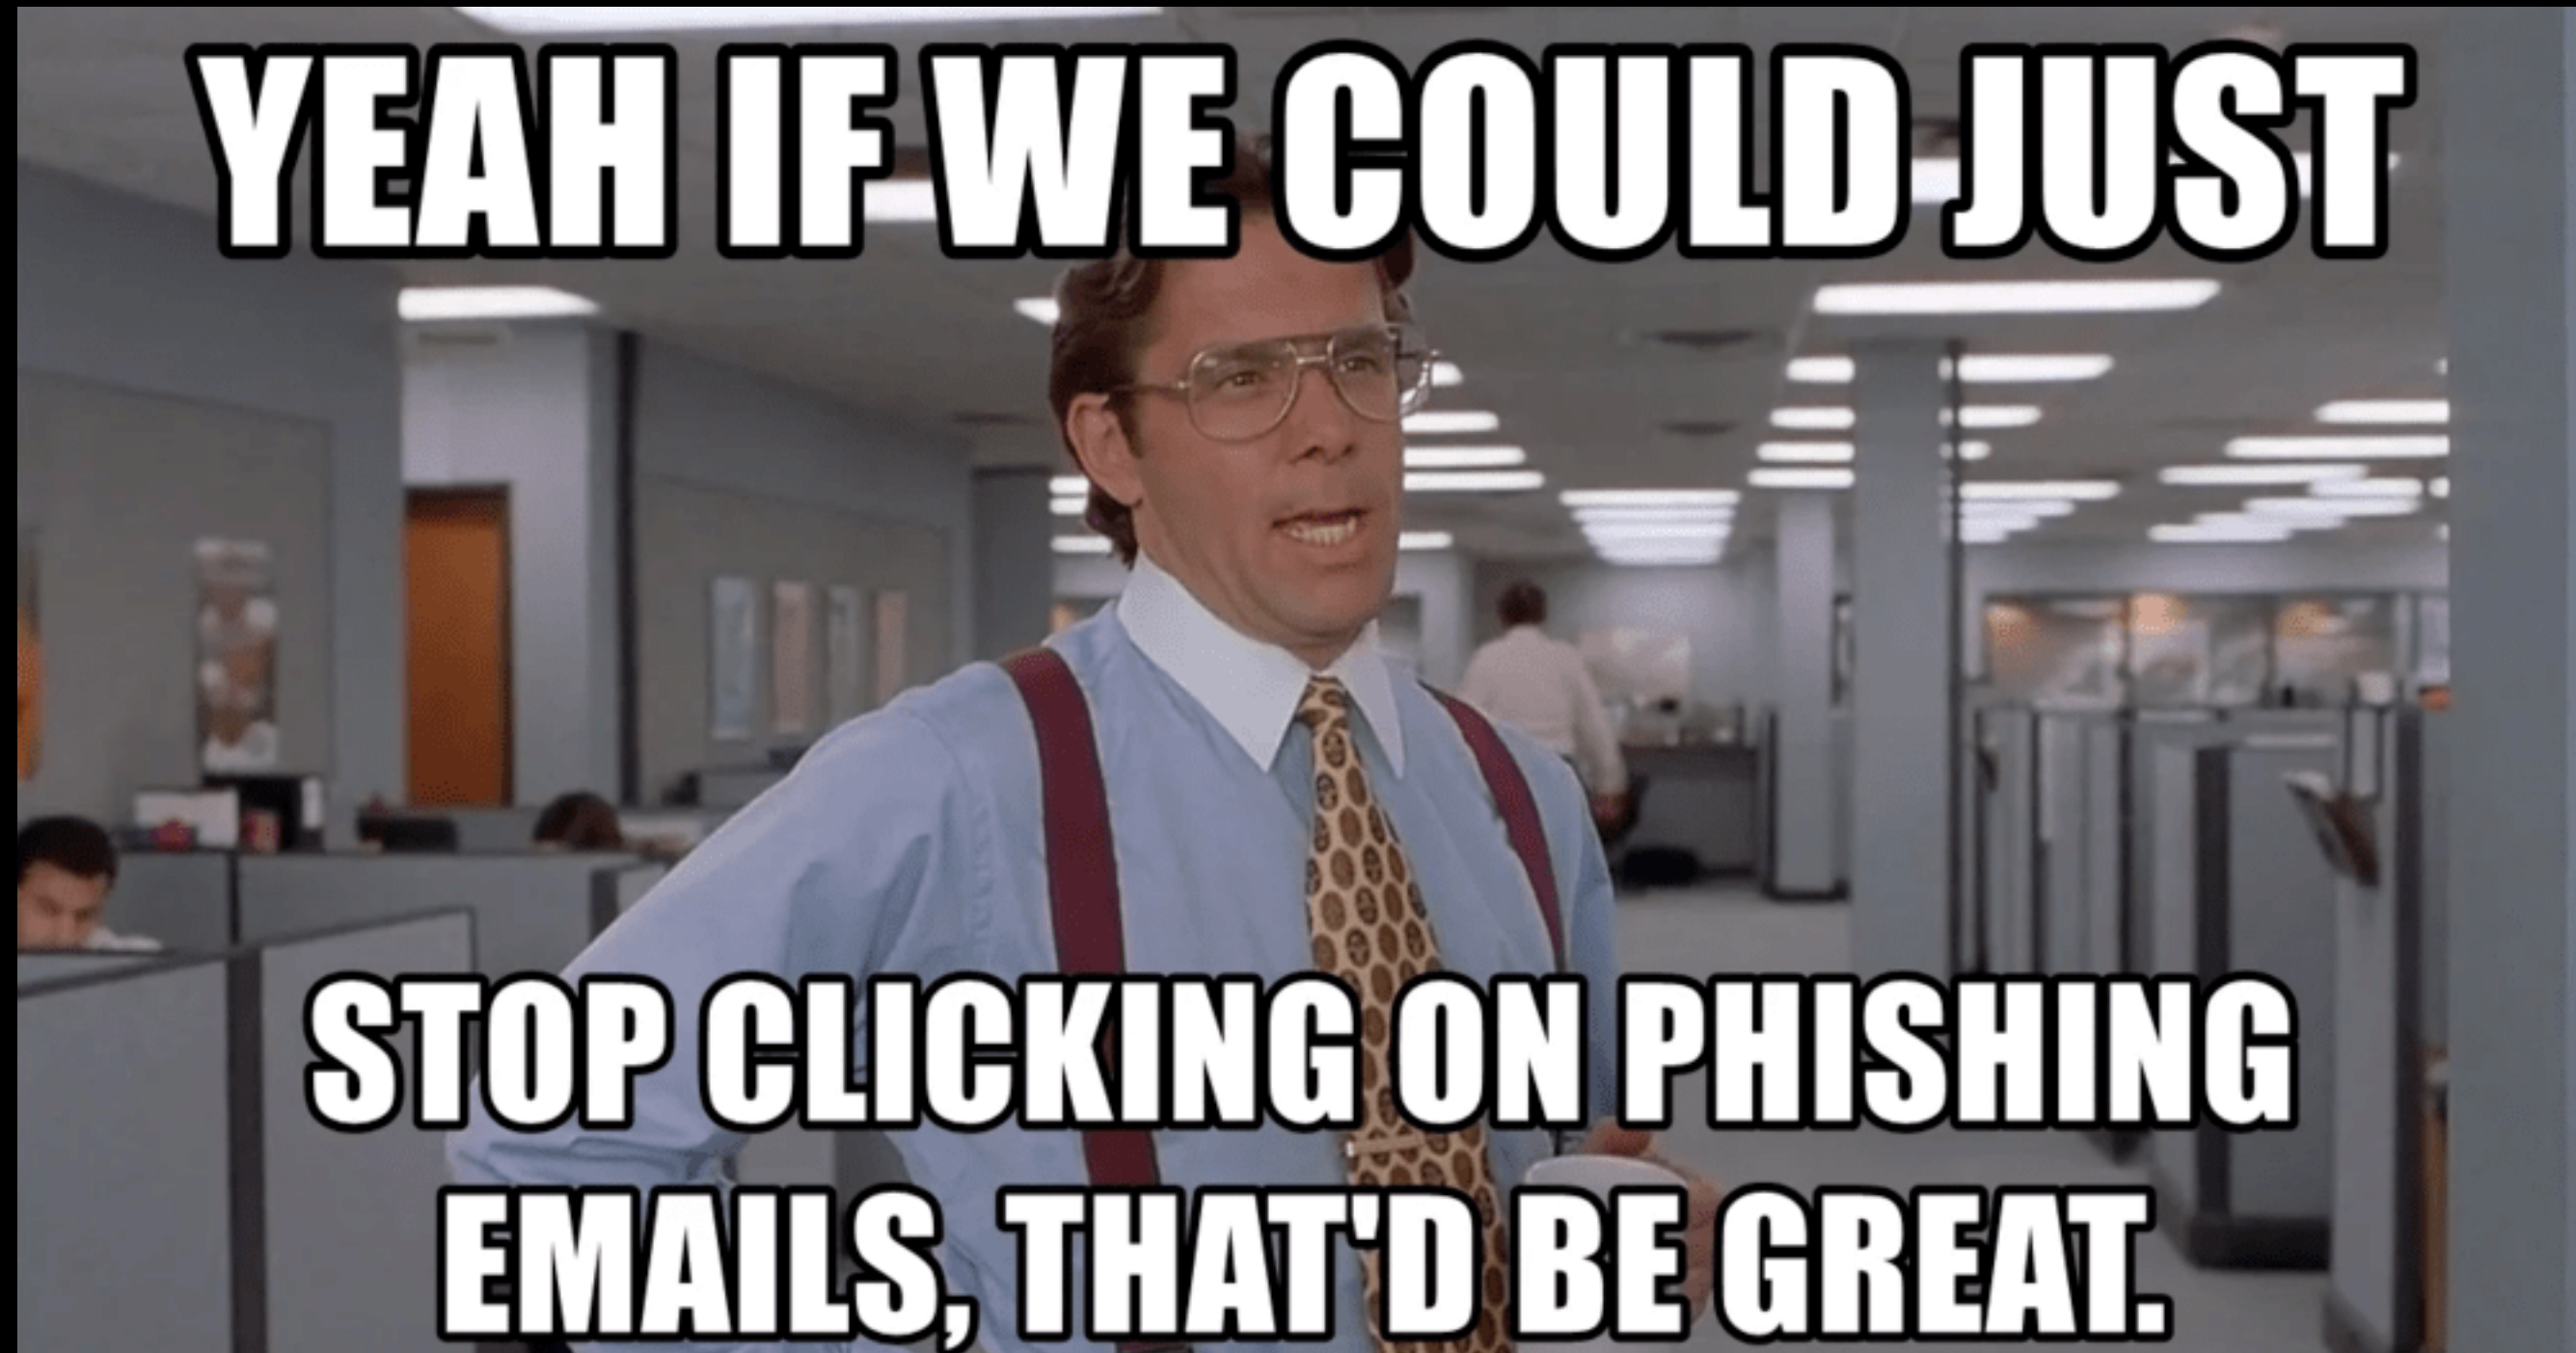

What kind of Security is necessary?

- Physical Security
- Network Security
- System Security
- Data Security

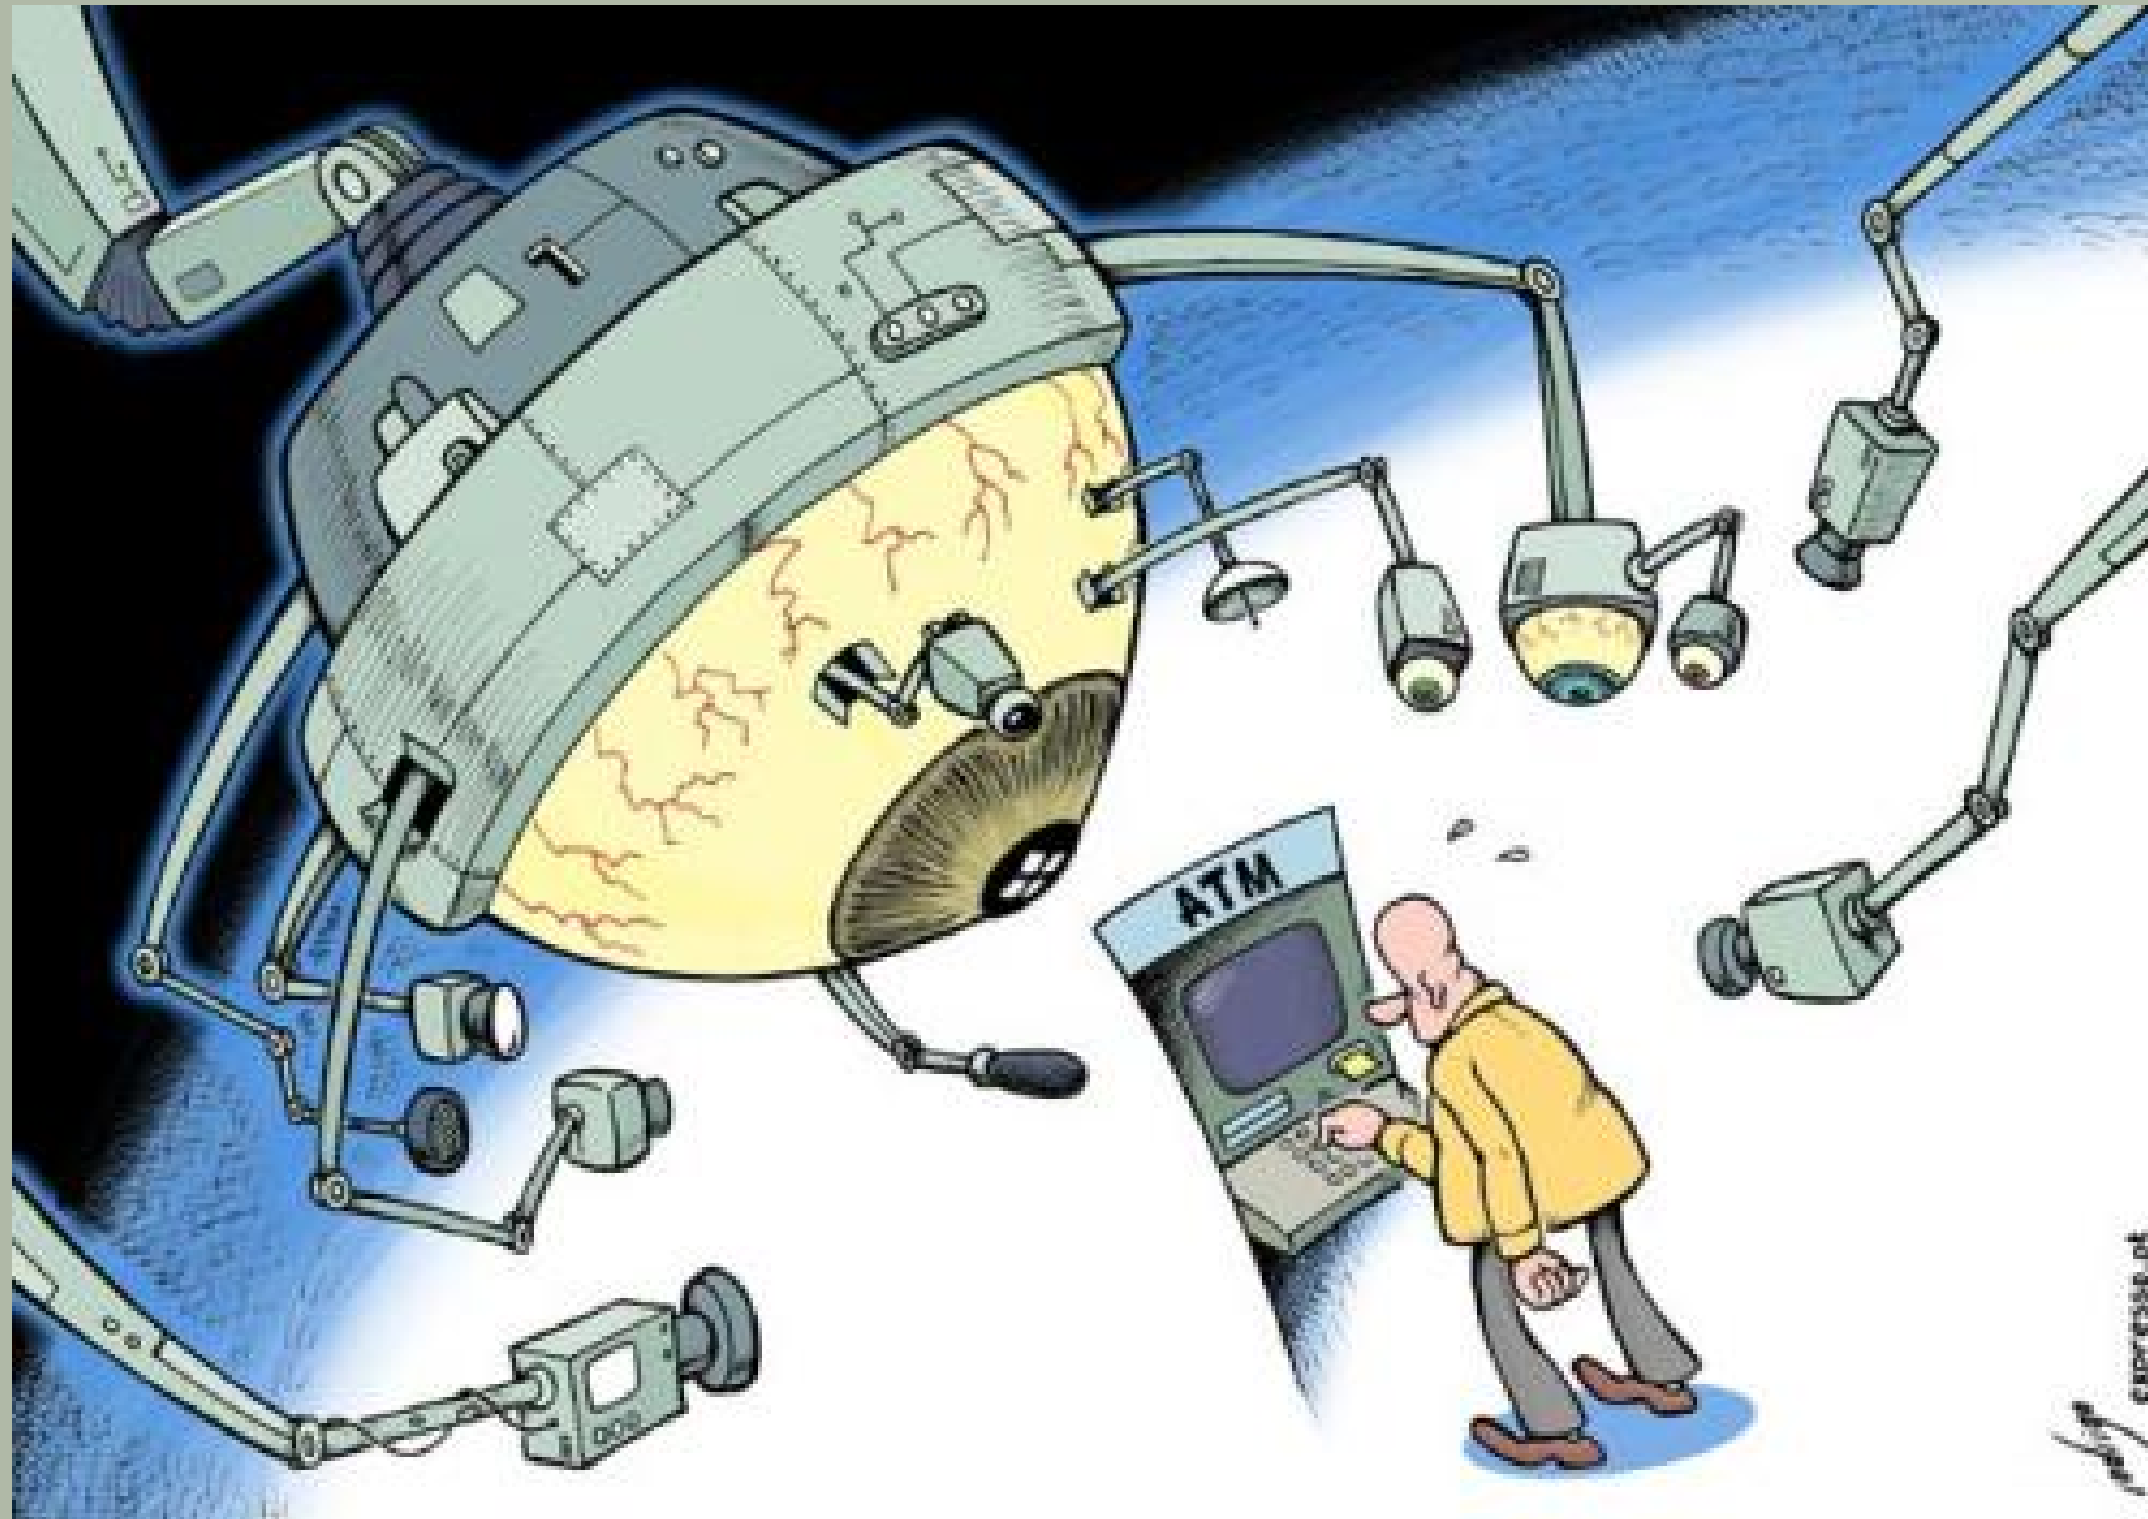

“There’s no money in the budget for data encryption, so I just rearranged all the letters on your keyboard.”

How can you protect yourself and your business?

Who's paying attention to what you're doing?

What should you ask
your IT Person or IT
Firm?

ONE MUST CHAMPION
ONESELF AND SAY

What is our plan?

What are
some easy
wins you can
implement
this week?
